EXPERIENCE

Statistical & Technical Data Analyst

Stefi Groupe Outsourcing

- 2021 - Present
- Spearheaded client communication and operational workflows for enterprise accounts, driving continuous SLA compliance and high service quality.
- Diagnosed, troubleshooted, and processed complex technical datasets using advanced software and scripting tools (Python, R, SQL)
- Documented technical procedures and drafted precise, structured analytical reports under strict deadlines
- Supervised operational teams, ensuring high standards of service quality and process compliance

Data Visualization Analyst (Freelance / Contractual)

DCDM Research

- 2024 - 2024
- KPI & Dashboard Automation: Automated KPI tracking and data validation workflows using Looker Studio
- Data Quality Assurance (DQA): Executed end-to-end data cleansing and validation processes to guarantee data integrity before core system integration
- Quality Assurance (QA) & Interface Testing: Executed UAT (User Acceptance Testing) on React web interfaces, validating end-to-end data flows and API integrations

Mathematics & Logic Teacher

LJRA Itaosy

- 2020 - 2021
- Taught general and applied mathematics to high school science students, emphasizing structured problem-solving methodologies
